JANESVILLE

History

In 1915, the Wisconsin Carriage Company switched its manufacturing efforts from buggies and carriages to coaster wagons & sidewalk toys and created the Janesville Products Company. The Janesville Coaster "speed wagon" and other toys were sold by the thousands, but the depression hit and the factory closed in 1940.

In 1978, a retired businessman sought out an original Janesville Coaster to gift to his first grandson. He replicated the original Janesville Coaster and created what was the first Janesville Coaster Wagon by Wisconsin Wagon Company.

Wisconsin Wagon Company is dedicated to the production of products of classic design and superior quality. Each item is built to last a lifetime and even generations. Some of our products are original design, in the classic tradition. Others are reproductions of the best of yesteryear. Each is hand built with care to be owned with pride!
